

Mohamed Ehab Mahmoud Fahmy

Open Pit Mine Geologist - Sukari Gold Mines (AngloGold Ashanti)

mohamedehabfahmy@hotmail.com

+201229192155 | +201119893115

/in/mohamed-ehab-fahmy/

Education

Alexandria University, Faculty of Science

Degree: Bachelor

Major-Minor: Geology-Geophysics

GPA: 3.38 (Very Good with Honor)

Rank: 1st

Alexandria, Egypt
Sep. 2016- Aug. 2020

Experience

Sukari Gold Mines (SGM)

Mine Geologist

Marsa Alam, Egypt
Mar. 2024- Until now

- Maintain high safety standards in daily operations, ensuring all geological activities are carried out in line with site safety requirements.
- Apply QA/QC protocols and SOPs to deliver accurate, reliable geological data for operational decisions.
- Monitor and coordinate mining activities from loading to dumping, ensuring compliance with short-term production and grade control plans.
- Control ore–waste boundaries through continuous face inspections, identifying clay-rich zones (talc/kaolinite) that impact processing performance.
- Lead ore spotting activities, guiding excavation teams to improve selectivity and reduce ore dilution.
- Oversee ROM pad operations and crusher feed, supporting consistent achievement of production and grade targets.
- Manage ROM pad blending strategies to control clay content, improving gold recovery and reducing processing issues.
- Coordinate underground ore cleaning to prevent metal contamination and eliminate potential crusher downtime.
- Design and implement Blast Movement Monitoring (BMM) programs, improving ore recovery and reducing misclassification after blasting.
- Analyze BMM results and update ore boundaries to ensure accurate post-blast ore delineation.
- Develop and deliver grade control drilling designs on a bench-by-bench basis, ensuring full coverage for resource modeling.
- Contribute to block model updates and resource classification improvement using grade control data and MIK estimation.
- Conduct detailed geological mapping of pit walls and floors, identifying lithological variations, alteration zones, and structural controls on mineralization.
- Integrate mapping and grade control data to refine ore zones, support selective mining, and identify additional mineralized areas.
- Forecast grade control drilling requirements and estimate remaining ore to support short- and medium-term mine planning.
- Prepare and present weekly and monthly performance reports, tracking compliance with mine plans and highlighting key operational insights.

Sukari Gold Mines (SGM)

Graduate Mine Geologist

Marsa Alam, Egypt
Oct. 2021- Mar. 2024

- Maintain high safety standards across all grade control activities, ensuring compliance with site safety procedures.
- Apply QA/QC protocols in line with SOPs to ensure accuracy and reliability of geological and sampling data.
- Supervise grade control drilling rigs to ensure proper sampling, minimizing sample loss and contamination.
- Design grade control drilling patterns to achieve full coverage of mining stages and support accurate ore delineation.
- Log drill holes and manage sample dispatch to the laboratory in a timely and organized manner.
- Monitor sample recovery on rigs to ensure sample quality and representativity.
- Conduct QA/QC checks on laboratory performance using certified reference materials (standards).
- Validate drilling and sampling data to maintain a high-quality and reliable geological database.
- Import and verify survey pickups and downhole surveys to ensure accurate spatial positioning of samples.
- Carry out geological mapping of pit walls to identify lithology, alteration zones, and structural features controlling mineralization.

Honours and Rewards

Sukari Gold Mines (SGM)
Employee of the Month (MRM Department scale)
Best Planned Task Observation (PTO) (Company scale)
Top Hazard Reporting Performer (MRM Department scale)

Marsa Alam, Egypt
March 2023
March 2023
For 2025

Projects

Sukari Gold Mines (SGM)
Weathering Profile

Marsa Alam, Egypt
Dec 2023

- Creating a weathering profile for a pioneering stage after GC drilling and logging.
- Correlating between weathering, structures and mineralization.
- Aiding the ore modelling and spotting to decide which materials should go to crusher or to the Leaching pads to maximize the ore control and achieve the highest profits.

Sukari Gold Mines (SGM)
Underground Exploration

Marsa Alam, Egypt
Dec 2022- Feb 2023

- Core logging to determine lithological and alteration variations, veining, sheared zones, structures and orientation measurements (Alpha and Beta)
- Plotting the logged data section by section.
- Correlating the logging with assay results to discover potential areas and test the models.

Trainings and Courses

Cardiff University

Structural Geology for Exploration and Mining.

Brett Davis

Structure identification, kinematics and cross time relationship.

Maptek

Vulcan essentials.

Vulcan Grade Control Designing.

Deka Dynamics

Modern mine sampling and quality management of sampling data.

BMT (Hexagon)

BMM Designing.

BMM installation, pickup, movement and data handling.

Sukari Gold Mines (SGM)

Surpac essentials.

City of Scientific Research and Applied Technology (SRTA)

Introduction to Geographic Information System (GIS).

Coursera

GIS specialization course.

Speak English professionally.

LinkedIn Learning

Microsoft Excel.

Microsoft Access.

PowerBI.

Leadership Tips and Tactics.

Body Language.

Strategic Thinking.

SQL.

Skills

Communication	Microsoft Office (Word, Excel, PowerPoint, Access DB)	Arabic.
Leadership		English.
Teamwork	Adobe (Photoshop, Illustrator, InDesign)	
Time management	PowerBI	
Problem-solving	SQL Queries	
Ability to learn	Maptek Vulcan	
Adaptability	Geovia Surpac	
Flexibility	BMM (Blast Movement Monitoring)	
Decision making	Leapfrog	
Organizational skills	DHLogger	
Computer skills		

Student Activities

ACE Team President

Alexandria, Egypt
Nov. 2019 - Aug. 2020

- Leading the team to achieve the objectives.
- Creating a competitive environment to insure the improvement of members' skills through many rewarding systems.
- Connecting all members to create a team-working environment.
- Forming various online sessions and meeting to improve the overall environment.

ACE Team Founder

Alexandria, Egypt
November 2019

- Making a more simplified scientific content distributed through all levels.
- Decreasing the gap between the academic information and the work-related ones.
- Improving the mindset for each member in the committee.
- Passing the experience gained to the new comers.

GSAU (Geological Society of Alexandria University) Vice President

Alexandria, Egypt
Sep. 2018- Feb. 2019

- Creating a new and more detailed rewards system based on each member performance.
- Creating the rule of "Member of the Month" based on the members' performance through the month.
- Creating a hierarchy with each committee head to have more systematic approach.
- Creating a "Joker" rule to help filling any possible gap within the team.
- Forming Training sessions by post-graduates and professionals personnel.

GSAU (Geological Society of Alexandria University) Vice Head HR

Alexandria, Egypt
Sep. 2017- June 2018

- Improving the HR committee through more in-depth interaction with the members.
- Providing a more detailed evaluation to improve the understanding of the members' skills with advising.
- Forming more trainings to make the members reach a better level.

GSAU (Geological Society of Alexandria University) HR Member

Alexandria, Egypt
Jan. 2017- June 2017

- Learning and discovering the potential I have.
- Improving my skills to reach the maximum level I can.
- Learning more about the field and expanding my knowledge.
